My solution for "cord clutter"

I got this lounge chair phone charger in Hawaii, and looking at it always makes me smile. :)

I love my Ikea desk top! The glass allows me to have all of my charts, plots, research photos, etc., spread out in front of me when I'm writing. But thanks to its two-layer design, I also always have an empty surface on which to work.

The stop sign everyone ignores

Your worship of Him is more important than your ministry for Him.

Here's the view out of the window from my sitting desk. We live on a cut-through street, and all day long most cars barely even pause at this intersection, much less stop--in spite of the stop sign. It's unbelievable!
